

Sliding Door Gear

Sliding Door Gear

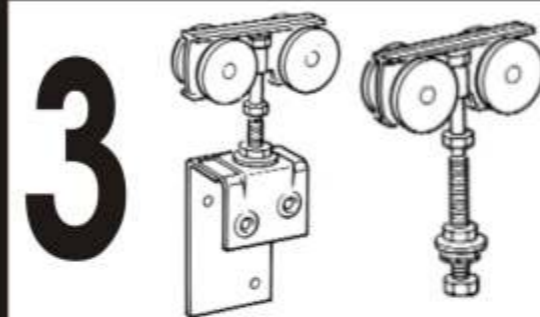

A range of heavier duty, top-hung sliding door gear for interior or exterior use. These systems are designed for use on heavier doors in factories, hospitals and industrial applications. The systems are in component form.

To specify or order a system is easy, first select which system is most appropriate for the application based on the opening size, door mass etc from the table below, choose either the 100, 200 or 300 system. The systems are then split into 6 different sections. Choose the parts for the appropriate system from the following sections:-

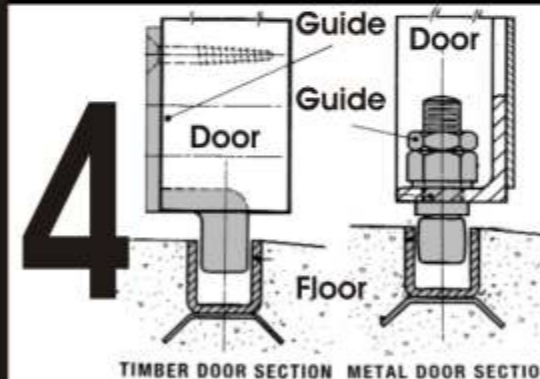

1. Top Track
 2. Brackets
 3. Hangers
- Then either;
4. Bottom Guides
 5. Bottom Channel
- Or;
6. Popular and easier alternatives to the Bottom Guide & Channel system (4 & 5)

System	Door Thickness	Max Door Weight	Max Door Height
100	20 - 50mm	100kg	2500mm
200	35 - 44mm	200kg	4000mm
